

Application procedure Quality mark

If you want to qualify for the quality mark, you must follow these steps:

1. Only CAN members can apply for the quality mark. Register if you are not yet a member via: <https://www.cannabinoïdenadviesbureau.nl/lid-worden/aanmelden/>.
2. Currently, the application of the quality mark can only be done for CBD oil if the product meets all the requirements of our industry standard. Check if your product complies.
3. Download the agreement for use of the quality mark. The agreement can be found on the members part of the website. Date, sign, scan and send to: info@cannabinoïdenadviesbureau.nl.
4. The CAN then registers you at Novatrace. Novatrace will contact you to schedule a course so that you can learn to work with the traceability system.
5. You enter all data of a product batch. After this has been entered completely (including analyses and artwork of label & box), the assessment committee of CAN receives the batch trace report from Novatrace.
6. CAN records its findings in the Certification report, which you receive from Novatrace. If the batch is approved, the quality mark is issued. If the batch is rejected, the quality mark may not be used on the artwork.
7. All submitted batches are published on <https://cancheck.org/>. Novatrace will contact you after the first batch to fine-tune a number of entries with you.
